

Usman Usmani

Place of birth: Mansehra, Pakistan | **Nationality:** Pakistani | **Email address:** osmanalee786@gmail.com | **LinkedIn:** www.linkedin.com/in/usmanosmani | **Address:** Hazara Pakistan, Mansehra, Pakistan (Home)

● ABOUT ME

Driven by curiosity and academic ambition, I aim to specialize in **AI-driven search technologies and intelligent software systems**. My interests include efficient algorithms, optimized information retrieval, and building scalable, data-intensive software solutions. Through graduate study, I seek to deepen my foundations in **artificial intelligence and software engineering** and contribute to impactful research.

● EDUCATION & TRAINING

20/08/2022 - 07/07/2026 - MANSEHRA, PAKISTAN

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING- HAZARA UNIVERSITY MANSEHRA

Field(s) of study:Bachelor of Science in Software Engineering | **Website:** www.hu.edu.pk

● RESEARCH INTEREST

Artificial Intelligence, Robotics Machine Learning, Deep Learning, Natural Language Processing (NLP) and Computer Vision.

● WORK EXPERIENCE

01/04/2025 - 01/06/2025 - ABBOTTABAD, PAKISTAN

AI ENGINEER NOVAXCELERATE

Developed AI solutions using Python, NLP, and deep learning tools. Worked on real-world projects involving chatbots, image processing, and data analysis. Collaborated with teams to deploy and optimize models.

● PROJECTS

Deepfake detection model Using CNN and LSTM Built Deep Learning model using CNN and LSTM (missing values, encoding, scaling), achieving 91.8% accuracy.

AI-Based Virtual Assistant (Urdu + English) AI Virtual Assistant Python-based assistant with NLP and 300+ voices; integrated speech recognition, messaging, web search, YouTube, weather/ news, password generation, and IoT automation.

Insurance Premium Prediction (Regression) Insurance Premium Prediction (Regression) Developed regression model with Linear Regression, Decision Trees, and Random Forest; applied feature engineering and hyperparameter tuning (GridSearchCV) for improved accuracy.

Gold Price Prediction (ANN) Developed an Artificial Neural Network to forecast gold prices using historical market data; applied feature scaling and optimization techniques to improve prediction accuracy.

Cat vs Dog Image Classification Using CNN Built a CNN with TensorFlow/Keras on ~20K images, applied augmentation, dropout & early stopping to reduce overfitting, and achieved 85% validation accuracy with optimized preprocessing.

● SKILLS

Languages:

Python | C | C++

Web Technologies:

HTML | CSS

Databases:

MySQL

Tools & Platforms:

Git | GitHub

CS Fundamentals:

OOPs | DBMS | Operating Systems | Computer Networks

● CERTIFICATION

Data Analysis Bootcamp: Master Data Science Skills
